Biocompatibility Information³

Test method	Description
ISO 10993-5	non-cytotoxic
ISO 10993-10	not a sensitizer
ISO 10993-23	no irritant

1. Tested for nonirritant, non-cytotoxicity, and not a sensitizer. When producing the 3D prints, it is the manufacturer's responsibility to confirm the specifications for the final use.
2. Refresh ratio is the amount of refreshing powder that is required to be mixed after the printing with unsintered material.
3. Tests were carried out in accordance with ISO 10993-1:2018. When producing the 3D prints, it is the manufacturer's responsibility to confirm the specifications for the final use. Material properties may vary based on the design and manufacturing practices.

Information provided within this document are average values for reference and comparison only. All tests were performed with print samples from Lisa X printed from the fresh powder. Parameters presented in this specification are subject to change without notice. Final part properties may vary based on printed part design, print orientation, and material handling. All mechanical tests were carried out on samples conditioned to ISO standards at (23 ± 2)°C and (50 ± 5)% r. h.
